

Spring Cleaning Tips using iSteamer®

Hot Vapour Steam Cleaning also helps to clean, disinfect, deodorize & dissolve dirt, grime, mold, mildew & more... On hard surfaces, i.e. Kitchen Cabinets, Wall tiles, etc, Steam will soften food & oil stains and greasy splatters, so it will be easier to wipe with soft cloth - best results using a cotton cloth. Steam Cleaning improves indoor air quality and protects your environment & family because no chemicals or detergents are used.

Protect your loved ones.

Some of the Applications :-
(best using iSteamer® Professional Model SM-22MH with Metal Head)

- Carpets, Rugs
- Window Blinds / Venetian Blinds
- Kitchen Cabinets, Sinks, Worktops
- Toilet Tiles & Grout, Shower Screen/ Curtain, Bath, Toilet Bowl
- Artificial Plants, etc...

Hints

iSteamer® has many uses that have not been mentioned here. This was meant only to give you a general idea of what can be achieved using the iSteamer® instead of "stereotyping" this great household appliance as only suitable for Vertical Clothing Steaming! However, the ways in which to use the attachments and brushes are in most cases universal. It is most helpful to always have a cloth towel or paper towel ready to use for removal of moisture, residue, dirt or grime from hard surfaces. 100% white cotton towels work best. Wipe immediately before the cleaned (steamed) area dries!
